EJP-AH-FG Fiberglass Hood

Protocols

Product Name	Acoustic Telephone Hood
Model No	EJP-AH-FG

Features

Materials	Fiberglass reinforced polyester (GRP)
Size	690*480*800 (mm)
Application	Refineries • Aerospace • Nuclear facilities Factories • Chemical plants • Bulk loading stations Mines • Drilling rigs • Steel mills Off shore platforms (AB-1000 only) Any high noise industrial location and more.

Specifications

Dimensions	690*480*800 (mm)
Weight	Approx. 6Kg
Stock Color	Yellow, Blue, Red, Others to order
Outer Shell	General Purpose Resin continuous filament
Flame	Class 1 Surface Spread of Flame
Shelf	Cold-rolled ABS Shelf, powder coated white
Acoustic Insulation	50mm Tissue faced non hygroscopic Rockwool (RW3) density 60kg/m3
Insulation Liner	White Perforated Polypropylene 3mm thickness
Apparatus plate	Cold-rolled Stainless Steel, 2mm thickness, powder coated white
Mounting Brackets	Cold-rolled Stainless Steel, 6mm thickness

Package

Unit size	690*480*800 (mm)
Wooden box size	720*500*830 (mm)
Packaging materials	Pearl cotton, Nylon box
Gross weight	6.1KG
Net weight	6 KG

Product Features

- Acoustic insulation: Noise Attenuation up to 15 dB
- Polyethylene plastic construction
- Polyethylene material ANSI/UL94 flammability approved
- Durable, lightweight, chemical resistant body
- Excellent low temperatures impact properties
- High performance polyurethane acoustic insulation liner, resistant to mildew and rot. Fire retardant class "0" rating
- Completely maintenance free, UV and corrosion resistant, impervious to chemical attack
- Convenient writing shelf with drainage hubs to prevent water accumulation
- Can be used both indoors, outdoors and offshore
- Permanent black handset graphic molded into the booth surface
- Standard color - Yellow or Blue or customized
- Optional colors available upon request 1 month
